

Aina Mardia Mohamad Kerta

Software Engineer | Information Technology Lecturer

Kuching, Sarawak • am.hana.mk@gmail.com • 010-4443430 • ainamardia.netlify.app

Dear Hiring Manager,

I am a software engineer and university lecturer based in Kuching, Sarawak, with a background spanning higher education, corporate research, and software development. I am writing to introduce myself and to express my interest in opportunities where I can contribute technical skill, analytical thinking, and a genuine commitment to doing meaningful work.

My experience began with a Research & Development internship at Sarawak Energy Berhad, where I designed and delivered an executive Project Overview dashboard in Microsoft Power BI, consolidating dispersed project data into a single analytical interface for the department. That work taught me how to turn scattered, complex information into clear insights that decision-makers can act on. I went on to join Satok Digital Bridge as a Software Developer, contributing to software solutions in a digital innovation environment while applying UI/UX design principles and data-informed development practices.

As a Part-Time Lecturer at i-CATS University College, I design course materials, deliver lectures and tutorials, and assess student progress against programme outcomes. This role has strengthened my ability to communicate complex ideas clearly, respond to feedback, and collaborate with colleagues to deliver consistent results. Alongside my Bachelor of Software Engineering (Hons.), I am preparing to commence a Master of Information Technology by research — a reflection of my commitment to continuous learning and rigour in everything I take on. I have also been fortunate to have my work recognised at state level as a two-time Silver Medallist at the Sarawak Innovation Convention.

I believe my blend of technical proficiency, analytical ability, and collaborative approach would allow me to make a real contribution to any team I join. Thank you for taking the time to read my letter. I would welcome the opportunity to connect and to discuss how my skills and experience might align with your needs.

Warm regards,

Aina Mardia Mohamad Kerta
