2 August 2026

Human Resources Department
i-CATS University College
Kuching, Sarawak

Dear Members of the Hiring Committee,

Application for the Position of Lecturer (Computing and Software Engineering)

It is with genuine enthusiasm that I submit my application for the position of Lecturer in Computing and Software Engineering. I write not as a stranger to i-CATS University College, but as one of its own: an alumna of the Bachelor of Software Engineering (Hons.) programme and, since January 2026, a part-time lecturer on its teaching staff. This position represents the natural deepening of a commitment I have already begun.

In my current capacity I deliver two modules — Introduction to Computer Systems & Applications (Foundation) and Digital Literacy (Bridging) — designing course materials, leading lectures and tutorials, and administering assessments aligned with programme outcomes. Teaching at the institution where I trained affords me an intimate understanding of the i-CATS student journey and of what early-stage learners need in order to progress with confidence. I am comfortable delivering both the theoretical and practical components of the curriculum, and preparation is already underway for me to assume Diploma-level modules.

My classroom practice is grounded in recent industry experience. As a Research & Development Intern at Sarawak Energy Berhad, I designed and delivered an executive Project Overview dashboard in Microsoft Power BI for the R&D department. While still completing that internship, I was offered a Software Developer position at Satok Digital Bridge — a role I held from May 2025 to January 2026, applying UI/UX design principles and data-informed development across delivered projects. This experience allows me to bring current, practice-based instruction in Java, Python, web development, and interface design into the classroom.

In September 2026 I commence the Master of Information Technology by research, further deepening the academic foundation I bring to this role. My record of innovation includes consecutive silver medals at the Sarawak Innovation Convention (2023 and 2024) and two features in the Sarawak Tribune in 2025 recognising my work and advocacy in technology, while my community involvement includes volunteering at IDECS in 2023 and 2024. I am also prepared to pursue relevant professional certifications, such as those offered by CompTIA, to further strengthen my curriculum delivery.

I would welcome the opportunity to discuss how my teaching record at i-CATS, my industry grounding, and my research trajectory can contribute to the Computing and Software Engineering programme. Thank you for your consideration; I am available for an interview at the committee's convenience.

Yours sincerely,

Aina Mardia Mohamad Kerta
